Municipal Application: Perfect Turf Road Medians

The Perfect Solution to Costly Grass Medians

Medians located on Lake Street (Rt. 20) in Hanover Park, ½ mile west of Barrington Rd

Project Description: Every year salt and pollution killed the new sod and left a median full of dirt patches and weeds. Most months of the year, even the weeds couldn't grow! Village managers had few choices. They could add an expensive irrigation system, but that still meant costly maintenance, frequent road closures for mowing, and extensive water usage. They could completely cover the medians with cement, but that was also going to be costly and certainly not too attractive. Finally, a better solution was presented. Perfect Turf Road Medians can typically be installed for less than the cost of cement, yet they look like a just-cut, lush lawn and require only minimal maintenance for the next 15 years! Learn more about Perfect Turf Road Medians by calling 888-SYN-TURF ext 502.
